

The DBFZ focuses on technical, economic and ecological research in the field of energetic and integrated material use of renewable resources in the bioeconomy. To enhance our team we are looking for an

## Research associate (m/f/d) “Supply Chain Concepts and Stakeholder Analysis for Bioeconomy”

### YOUR TASKS:

- Heading international projects and work
- Development of mobilisation and management concepts as well as supply chain solutions for (utilised and un-utilised) biogenic resources on national, EU and international level
- Application of stakeholder analyses to determine hindrances and enablers of resource availability as well as motivation of relevant stakeholder
- Collection, analysis and evaluation of quantitative and qualitative data (e.g. surveys, interviews, workshops)
- Development of concepts for plausible presentation of the results
- Scientific handling of the results (conferences, publications etc.)
- Collaboration with a broad range of partners in EU projects

### YOU HAVE:

- Scientific university education (master's degree, diploma) in business and management (e.g. supply chain management, operations management or other relevant studies)
- Professional experience for at least 3 years required
- Experience in self-determined project work preferred
- Experience with qualitative analysis software preferred, e.g. NVivo or Atlas.ti
- Very good oral and written communication skills in German and English

### WE OFFER:

- Independent and diverse tasks with a wide range of advanced training and qualification opportunities
- Flexible working hours
- An experienced and motivated team in a modern and collegial working environment
- The aim is to take over a team leadership
- A remuneration according to TVÖD (Bund) EG 13, including the social benefits of the public service

The position is designed with 100% working time (currently 39 hours / week) and is limited to a term of 2 years.

Please submit your compelling application (in a single attachment, preferably as pdf, max. 5 MB).
